

ENVIRONMENTAL AND SUSTAINABILITY POLICY STATEMENT

Hako Machines Ltd is one of the UK's leading manufacturers and service providers of superior technology for indoor cleaning, outdoor cleaning and grounds maintenance. We intend to continually demonstrate our commitment to the highest environmental performance standards within all levels of the organisation. Hako Machines Ltd aim to ensure that activities do not compromise the ability of future generations to meet their own needs.

Eco-friendly use is one of our top priorities when developing our machine. We focus on developing customers can benefit from our machines' superior economic efficiency.

Hako Machines Ltd aim to minimise its environmental impacts by complying with all relevant legislation as a minimum, observing applicable best practice and by operating in a responsible manner to preserve and protect the quality of the environment. Hako Machines Limited have achieved the ISO 14001 International Environmental Standard and pledge to maintain the standards at the same time as striving for continuous environmental improvement.

Hako Machines Ltd will aim to establish environmental objectives and targets to continually improve our environmental performance including:

- Monitoring activities to minimise air, water and land pollution
- Conserving resources and actively working towards minimising the amount of waste produced throughout its operations and business services by promoting reduction, re-use, repair and recycling
- Actively recover waste industrial and automotive batteries supplied to end users for treatment
- Wherever possible, aim to use recyclable materials in packaging
- Minimising waste energy by improving energy efficiency, promoting energy conservation and using renewable energy where possible throughout our premises, activities and in the production of our machines
- Supporting our manufacturing operation to manufacture equipment that uses sustainable materials, and therefore reducing environmental impact. Also, to ensure our equipment can use fuels, lubrications and chemicals that are less harmful to the environment
- Encouraging efficient forms of transport
- Aiming for environmentally responsible purchasing
- Supporting the protection of biodiversity and ecosystems

The active participation of all employees is essential to make this policy successful. All employees are expected to always conform to the company environmental policy and we will provide suitable and sufficient information, instruction and training to all employees.

We will investigate all environmental incidents that may occur and will implement corrective actions to prevent reoccurrence.

Everything we do here at Hako affects our environment and our future. Hako is constantly developing new ways and techniques to help protect the environment in our everyday activities: from the selection of materials and sustainable development to the resource-efficient production of the machines.

Right from the development stage, we plan the environmentally friendly use of our machines. This means, for example, efficient solutions with a long service life and economical use of water and cleaning agents during use.

This policy will be implemented, managed, communicated and subject to a regular review, annually or when there are any significant changes, to ensure it always remains relevant and effective. We will ensure that all policies are easily available to all employees, customers and interested parties.

This policy has my full support, and I/we will ensure that sufficient resources, both financial and physical are available so that the policy can be implemented effectively.
